

Congressional **policy brief** Series

We are pleased to publish these briefs on the design of a greenhouse gas cap-and-trade program and complementary policy approaches. Developed by Pew Center staff with input from a variety of outside experts, these briefs walk policymakers through important design choices and the strengths and weaknesses of various policy approaches. The modular format will allow additional briefs to be developed over time in response to questions from policymakers and their staffs. We hope these materials and related outreach will provide the new Congress and new Administration with valuable grounding on issues related to crafting U.S. climate policy. The Pew Center is grateful for support from the Doris Duke Charitable Foundation for this effort.

Eileen Claussen

President, Pew Center on Global Climate Change

Project Director • Vicki Arroyo

Project Coordinators • Heather Holsinger • Michael Wolosin

Project Consultant • Peter Linquiti

Additional Contributing Authors • Sanjana Ahmad • Liwayway Adkins • Josh Bushinsky • Steve Caldwell • Elliot Diringier • Judi Greenwald • Tim Juliani • Janet Peace • Naomi Pena

A number of colleagues and outside experts provided valuable input on earlier versions of individual briefs in this series, including: Dan Abernathy • Joe Aldy • James Bradbury • Dallas Burtraw • Steve Corneli • Kyle Danish • Terry Dinan • Denny Ellerman • Laura Fischer • Mark Flugge • David Greene • Stephanie Grumet • Jay Gullede • David Harrison • Reid Harvey • David Hawkins • Patrick Hogan • Anna Motschenbacher • Ian Parry • Namrata Patodia • Billy Pizer • Tim Profeta • Manik Roy • Ed Rubin • Joel Smith • Dan Sperling • Tom Steinfeldt • James Warner • and members of the Offsets Quality Initiative and the Pew Center's Business Environmental Leadership Council.

Special thanks to Andrew Bowman of the Doris Duke Charitable Foundation for his guidance and support.
