

We are happy to introduce our upcoming event

# North America and **The Carbon Markets**

## Washington DC 17-18 January, 2007

A ground-breaking event designed to introduce North American stakeholders to lessons and opportunities in the global carbon markets.

Join public and private sector delegates from across the United States and Canada for an innovative forum of speakers, panel discussions and workshops covering the following topics:

- ▷ An update on the status of North American carbon markets and how they are likely to develop
- ▷ Lessons from the European Union Emissions Trading System: find out from market participants what worked, what did not and why
- ▷ Opportunities for North American investors in global carbon finance: how Americans and Canadians can participate now
- ▷ The umbrella of commodities: understand the impact of carbon on the power and natural gas markets
- ▷ Market design: compare and link West Coast, East Coast and Federal cap-and-trade schemes
